Heritage in the Digital Era

Editors: Marinos Ioannides [Higher Technical Institute, Nicosia], Addison Alfonz [UNESCO-WHc, Paris], Andreas Georgopoulou [NTU, Athens], Loukas Kalisperis [Cyprus Institute, Nicosia], Andre Brown [University of Liverpool], Denis Pitzalis [C2RMF, Paris]

ISBN 978-1-907132-25-4 · iv + 258pp · 240 x 160mm · £58.00 · Publication date: November 2010

NEW BOOK INFORMATION FROM MULTI-SCIENCE PUBLISHING

Contents

Principles for Appropriate Heritage Documentation in Conservation
Mario Santina Quinier [Katholieke Universiteit Leuven, Louvain, Belgium]

Cultural Heritage
P. Sartori and M. Batbali [Center for Documentation of Cultural and Natural Heritage (CULTNAT)]

Imagined Society – Imagery and Storytelling
Andreas Winkler [cultural heritage, Turin, Italy]

Emerging Tools for Heritage Recording
B. van Genisten [University of Applied Sciences St-Lieven, Gent, Belgium]

Spatial Information Systems: A Practical Tool for Sharing and Disseminating Knowledge about Cultural Heritage
F. Ranoud [DTIAS, Turin, Italy]

Heritage Recording Using Image-Based Technologies
Joel L. Lema (Polytechnic University of Valencia, Valencia, Spain)

Missing the Metaverse
S. S. Haim Digital Heritage, Jerusalem, Israel

*MassHabitat*: Heritage: Formats, Licenses and the Allure of Openness
Eric C. Kansaa and Sarah Whitcher Kansa [University of California, Berkeley, USA]

On the Impact of Knowledge Management of 3-Dimensional Archaeology & Cultural Heritage
Manolis Vavalis [University of Thessaly, Volos, Greece]

EuropeanaLocal: Its Role in Improving Access to Europe’s Cultural Heritage through the European Digital Library
Rob Davies [MDR Partners, scientific coordinator and project managers for EuropeanaLocal]

Appropriate Mobile Interfaces to Heritage Sites
Susan O’Hara, Mike Knight, Martin Winchester, Yu-Heng Chen and Ghousia Saeed [University of Liverpool, UK]

Technological developments are hugely impacting the work of researchers, documenting and archiving our Cultural Heritage. This collection of peer reviewed papers explores the theme of cultural heritage and the technologies in relation to data capture, digitization, architectural computing reconstruction, modelling, information data processing, virtual reality applications, standardization, data visualization and archiving. The exploration of possibilities of digital preservation makes this book a valuable resource for the cultural heritage community.
